QUACH TRONG NHAN

FRONTEND SOFTWARE ENGINEER

dhnhan19999@gmail.com | 084 911 9919 | linkedin.com/in/qtnkaca | Ho Chi Minh City

PROFESSIONAL SUMMARY

Frontend Software Engineer with 3+ years of web development experience across POS, banking, workforce management, and enterprise applications. Experienced in building responsive and maintainable frontend solutions using React.js, Next.js, TypeScript, Redux, and Material UI, with hands-on REST API integration and application state management. Worked on a salon POS platform serving 3,000+ merchants and enterprise applications for Japanese clients. Comfortable collaborating with designers and backend developers in Agile teams to deliver reliable business workflows across desktop, tablet, and mobile.

Experienced in using AI coding agents (Github Copilot, Codex, Claude Code, Cursor)

TECHNICAL SKILLS

Languages & Core: JavaScript (ES6+), TypeScript, HTML5, CSS3, SCSS
Frontend Development: React.js, Next.js, Vue 3, Nuxt 3, Material UI, responsive & mobile-first design
State & Data Flow: Redux, RxJS
API & Integration: REST APIs, Axios, Firebase
Tools & Delivery: Git, GitHub, Jira, Agile/Scrum

WORK EXPERIENCE

XSOFTS

Dec 2025 - Jul 2026

Frontend Developer

Domain: Salon POS & Management Platform
Technologies: React.js, Next.js, TypeScript, Redux, Material UI, Axios, REST APIs

- Developed and maintained frontend features for a salon POS platform serving 3,000+ merchants.
- Built reusable and responsive UI components with React.js, Next.js, Redux, and Material UI.
- Integrated frontend modules with backend services through REST APIs and Axios to support end-to-end business workflows.
- Collaborated with designers and backend developers in a 21-member Agile team and delivered responsive interfaces across mobile, tablet, and desktop.
- Participated in feature implementation, bug fixing, maintenance, and continuous improvements across core POS modules.

Salon POS System - Salon Management Platform

- Contributed to six core modules: Ticket, Turn, Appointment, Customer, Employee, and Print.
- Implemented frontend functionality and API integrations supporting daily salon operations and management workflows.

GMO-Z.COM RUNSYSTEM

Oct 2022 - Dec 2025

Frontend Developer

Domain: Banking, Workforce Management & Enterprise Applications
Technologies: React.js, TypeScript, Vue 3, Nuxt 3, Redux, RxJS, Firebase, Axios, REST APIs

- Developed frontend applications for enterprise and Japanese clients using React.js, TypeScript, Vue 3, and Nuxt 3.
- Implemented reusable components, business forms, data listings, and workflow-based interfaces.
- Integrated frontend applications with backend services through REST APIs and coordinated application data flows with backend developers.
- Managed application state using Redux and RxJS and developed responsive interfaces across different screen sizes.
- Participated in maintenance, feature enhancement, and bug fixing throughout the project lifecycle.

Sumika Kanri - Bank Loan Information Management *Nov 2022 - Oct 2024*

- Developed React.js and TypeScript modules for a Japanese banking client, including loan information listings, application forms, and approval workflows.
- Integrated REST APIs and Firebase; used Redux and RxJS to manage application state and asynchronous data flows.
- Implemented responsive interfaces while maintaining stable UI behavior across different screens.

Remote Work Cloud - Remote Workforce Management *Oct 2024 - Dec 2025*

- Built responsive Vue 3 and Nuxt 3 interfaces and reusable frontend components for workforce management features.
- Integrated backend REST APIs through Axios and collaborated with backend developers on frontend data flows.

Kobelco ER - Leave Management Application *Oct 2022 - Nov 2022*

- Built React.js forms for creating, updating, and viewing employee leave requests.
- Integrated REST APIs using Axios and used Redux for application state management.
